

A 92.9/6 Pou 1-1 (11-92)

HATCHERY PRODUCTION

November 1961

December 14, 1961

Chick Production

Commercial hatcheries produced 163,143,000 chicks during November--up 1 percent from November 1960. Production of broiler-type chicks at 142,484,000 was down 1 percent from November 1960. Production of broiler-type chicks January through November 1961 totaled 1,956,346,000--up 8 percent from comparable period in 1960. Eggs in incubators on December 1 indicate that the broiler-type hatch in December will be slightly below the December hatch last year.

Egg-type chicks hatched in November totaled 20,659,000--up 24 percent from the November hatch in 1960. For the 11 months of 1961, the number of egg-type chicks hatched totaled 502,783,000--up 9 percent from the same period in 1960. Eggs in incubators on December 1 indicate a slightly larger egg-type hatch during December 1961 than a year ago.

Poult Production

Heavy white breed poult production during November of 1,334,000 was 4 percent larger than in November 1960. The hatch of other heavy breeds (mostly bronze) of 381,000 was 46 percent below the hatch of November 1960. Light breed poult hatch in November 1961 totaled 280,000--54 percent less than a year earlier. Total all poults hatched in November at 1,995,000 was 23 percent less than in November 1960. Eggs in incubators on December 1 indicate that the December hatch of heavy white breeds will be about the same or slightly less than the hatch in December last year. The indications for other heavy and light breed hatches are for considerably smaller hatches than in December last year.

Since the first of the year, hatcheries have produced 109,350,000 poults -- up 21 percent from comparable output in 1960. The cumulative output (January through November) of heavy white breeds was 32,502,000-- up 42 percent; other heavy breeds, 65,055,000--up 15 percent; and light breed poults 11,793,000--up 4 percent.
